ARYAN

Data Analyst | Dashboards & Reporting | Data Quality & Analytics
+91-7761075766 | aryan99raj34@gmail.com | Bangalore India | English Proficiency: B2

PROFESSIONAL SUMMARY

Detail-oriented and self-driven Data Analyst with hands-on experience turning raw data into clear insights, dashboards, and executive-ready reports using Excel, Power BI, SQL, and Python. Comfortable collecting data from multiple sources, building structured analytical workflows, and communicating findings to both technical and non-technical audiences. Known for strong attention to detail, quick adoption of new tools, and a proactive approach to improving accuracy and efficiency in every project.

CORE STRENGTHS

- Excel & Dashboards: Proficient in Excel-based analysis and reporting, plus Power BI and Tableau dashboard development for executive-level summaries.
- Clear Communication: Skilled at translating complex data into simple, decision-ready insights and presenting findings to varied stakeholders.
- Analytical & Detail-Oriented: Strong track record in data cleaning, validation, and quality checks — consistently accurate, repeatable workflows.
- Self-Driven Learner: Proactively picked up Power BI, Tableau, and Scikit-learn independently across academic and internship projects.
- Multi-Source Data Collection: Experienced in extracting and consolidating data from databases (SQL) and structured files for end-to-end analysis.

EXPERIENCE

Data Science Intern — InternBoot (Powered by Employment Express) *08/2025 – 09/2025 | Virtual*

- Collected and consolidated data from multiple structured sources, then cleaned and transformed it using Python, Pandas, and SQL to improve accuracy and reliability for downstream reporting.
- Built exploratory reports and summarized findings for review, strengthening the depth and clarity of insights shared with stakeholders.
- Applied structured data preprocessing and pattern identification to support data-driven decision-making, including building and validating ML models (Logistic Regression, Random Forest).
- Reduced manual data handling by designing repeatable, automation-friendly preprocessing steps, improving overall workflow efficiency.

PROJECTS

Supermarket Sales Analysis & Dashboard

- Analyzed 100+ sales transactions in Excel and Python to identify revenue trends, product performance, and customer behavior patterns.
- Cleaned and transformed sales data using Pandas and NumPy as part of a structured, repeatable data-quality process.
- Built dashboards and a summary report translating findings into clear, decision-ready insights for a non-technical audience.

AI-Powered Campus Intelligence & Dashboard

- Designed an end-to-end analytical process — SQL extraction, Python/Pandas cleaning, Power BI reporting — for 100+ student records collected from multiple sources.
- Built an interactive Power BI dashboard and executive summary tracking KPIs, academic performance, and placement trends.
- Applied Logistic Regression and Random Forest models to identify at-risk students and estimate placement probability.

TECHNICAL SKILLS

- Reporting & Dashboards: Excel, Power BI, Tableau, PowerPoint, Dashboard Development, Executive Summary Reporting, Data Storytelling
- Programming & Analytics: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- SQL & Databases: SQL, Data Extraction, Joins, Aggregations, Subqueries, DBMS Fundamentals
- Data Quality & Processing: Data Cleaning, Data Validation, Data Quality Checks, Exploratory Data Analysis, Statistical Analysis
- Machine Learning & Tools: Logistic Regression, Random Forest, Clustering, ETL, Automation, Business Intelligence, Process Improvement

EDUCATION

B.Tech, Computer Science Engineering — RIT Roorkee (UTU) 2022 – 2026 | CGPA: 7.5 / 10.0
